Please advise whether the non-elected claims 29–37 should be prosecuted in a divisional application. Any divisional application must be filed prior to issuance of the reference application. Please also note that if one or more of the currently named inventors is no longer an inventor of at least one claim of the divisional application, the inventorship must be amended so that only the correct inventors are named in the divisional application.

We will assume that the case is still entitled to small entity status. If the subject matter claimed in this application has been licensed or assigned, or if there is an obligation to license or assign the subject matter, to other than a small entity, please let us know so that we can notify the Patent & Trademark Office and revise our debit note accordingly.

As always, should you have any questions regarding this or any other matter, please do not hesitate to contact us.

With best regards,
