Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Applicant's election with without traverse of the non-elected Claims in the reply filed on 4/1/2021 is acknowledged.

Examiner's Amendment

4. An Examiner's Amendment to the record appears below. Should the changes be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in the phone conversation at 12:56 PM of 4/13/2021 with Mr. Lonnie Holder.

The application has been amended as follows:

Claims: 29-37. (Canceled)

Reasons for Allowance

5. **Claims 20-28 and 38** are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art of record are Hastings (U.S. Publication No. 2006/0085255), Brennan (U.S. Publication No. 2008/0281651), and Clement (U.S. Publication No. 2010/0161360). While Hastings, a method and system for managing a strategic plan via defining and aligning strategic inputs, teaches a management system, an initiative interface system, a communication system, and a controller connected to the management system, the initiative interface system, and the communication system, the management system is provided with a vision, at least one goal, and a strategy to the management system, using the vision, the at least one goal and the strategy, the initiative interface system is developed to include at least one objective, at least one measure, and at least one target in the initiative interface system are plans/targets, for at least one of a plurality of perspectives, wherein the perspectives include at least one of an organization financial perspective, an organization customer perspective, an organization internal business processes perspective, and an organization learning and growth perspective, the at least one objective includes a relationship to the at least one measure, the at least one measure includes a relationship to the at least one target a link is established for at least one of the organization financial perspective, the organization customer perspective, the organization internal business processes perspective, and the organization learning and growth perspective, to at least one strategic initiative outcome and to at least one strategic initiative impact and the at least one of the organization financial perspective, the organization customer perspective, the organization internal business processes perspective, the organization learning and growth perspective, at least one strategic initiative outcome, at least one strategic initiative impact, and the link are provided to at least one of a workforce, a management team, and a leadership through the communication system. Brennan also teaches including a plurality of activities developing from the at least one objective, the at least one measure, and the at least one target, and providing a framework for aligning the at least one goal, the at least one objective, the plurality of activities, the at least one measure, and the at least one strategic initiative impact. Brennan does not teach a causal relationship or the specific way the adjusting of the

inputs are used to recalibrate and iteratively adjust the strategic initiative. Hastings, a system for modeling and utilizing metrics, processes, and technologies, teaches a causal relationship utilizing causal modeling with causes and effects which are used to improve performance of a system, but does not explicitly stat the feedback loop which is used to iteratively adjust the strategic initiative. Clement, a system and method for strategic planning, teaches utilizing machine learning as well as the vision, goals, and objectives being utilized with machine learning, but not the explicit manner as to which the inputs are being used to iteratively update the model in a feedback loop. Although the prior art does discuss different aspects of the claimed invention, none of the above prior art explicitly teaches the explicit manner as to which the inputs are being used to iteratively update the model in a feedback loop, and these are the reasons which adequately reflect the Examiner's opinion as to why Claims 20-28 and 38 are allowable over the prior art of record.

Furthermore, the claims are patent eligible as they meet the Alice test for eligibility under 35 USC §101 and the 2019 PEG as the claims recite limitations which are not abstract under Prong 2 of step 2A of the Alice analysis, as any abstraction recited in the Claim limitations which may be construed as “A Mental Process” or a “Certain Method of Organizing Human Activity”, such as collecting, analyzing, and transmitting information for the purposes of determining a likelihood of achieving at least one predictive outcome, are integrated into a practical application, as the additional elements apply the judicial exception in a meaningful way by utilizing a feedback loop which iteratively adjusts the strategic initiative using the first, second, and resource inputs to calibrate the model. Thus independent Claim 20 is not directed at an abstract idea under 2A Prong 2 of the 2019 PEG, as the Claims are integrated into a practical application and thus eligible under 35 USC §101 Alice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such

submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
